Offer #2025-08682

Construction of torso conductivity map library from CT images and computation of statistical distributions of torso geometries

Contract type : Internship agreement

Level of qualifications required : Master's or equivalent

Other valued qualifications : First or second year Master student or Fourth year Bachelor

Fonction : Internship Research

Level of experience : Recently graduated

About the research centre or Inria department

The Inria Saclay-Île-de-France Research Centre was established in 2008. It has developed as part of the Saclay site in partnership with **Paris-Saclay University** and with the **Institut Polytechnique de Paris** .

The centre has **40 project teams** , 32 of which operate jointly with Paris-Saclay University and the Institut Polytechnique de Paris; Its activities occupy over 600 people, scientists and research and innovation support staff, including 44 different nationalities.

Context

This internship is part of a new collaboration between Idefix Team (Inria Saclay) and Carmen Team (Inria Bordeaux). The intern will be based in the Idefix Team at Saclay, France. There will be some travel between Saclay and Bordeaux.

There will be regular meetings by video-conference with supervisers. Shared code development will be on GitHub.

Assignment

The intern will work under the supervision of Jing-Rebecca Li and collaborators at Inria Bordeaux.

The intern will download publicly available CT images of human torso from 2 public repositories online and use automatic segmentation software to process the 3D images. Geometrical information about the segmented organs will be stored and their statistical distributions computed.

The results will be used to construct a library of realistic conductivity maps of human torso to be used for modeling of the electrical impedance tomography problem.

If time permits, the library may be augmented by artificially generated images that obey the relevant statistical distributions.

Main activities

Use software from medical imaging such as automatic segmentation;

Compute statistical information about the segmented organs;

Code in Python;

Write up results in Latex;

Skills

Profile sought:

Having completed coursework in Image Processing, Statistics, Machine Learning;

Be able to program in Python and use GitHub;

Be able to speak and write fluently in English;

Benefits package

- Subsidized meals
- Partial reimbursement of public transport costs
- Leave: 7 weeks of annual leave + 10 extra days off due to RTT (statutory reduction in working hours) + possibility of exceptional leave (sick children, moving home, etc.)
- Possibility of teleworking (after 6 months of employment) and flexible organization of working hours
- Professional equipment available (videoconferencing, loan of computer equipment, etc.)
- Social, cultural and sports events and activities
- Access to vocational training
- Social security coverage

Remuneration

Gratification

General Information

- **Theme/Domain :** Numerical schemes and simulations
  Scientific computing (BAP E)
- **Town/city :** Palaiseau
- **Inria Center :** Centre Inria de Saclay
- **Starting date :** 2025-05-01
- **Duration of contract :** 6 months
- **Deadline to apply :** 2025-04-30

Contacts

- **Inria Team :** IDEFIX
- **Recruiter :**

About Inria

Inria is the French national research institute dedicated to digital science and technology. It employs 2,600 people. Its 200 agile project teams, generally run jointly with academic partners, include more than 3,500 scientists and engineers working to meet the challenges of digital technology, often at the interface with other disciplines. The Institute also employs numerous talents in over forty different professions. 900 research support staff contribute to the preparation and development of scientific and entrepreneurial projects that have a worldwide impact.

> **Warning** : you must enter your e-mail address in order to save your application to Inria. Applications must be submitted online on the Inria website. Processing of applications sent from other channels is not guaranteed.

Instruction to apply

Defence Security :
This position is likely to be situated in a restricted area (ZRR), as defined in Decree No. 2011-1425 relating to the protection of national scientific and technical potential (PPST).Authorisation to enter an area is granted by the director of the unit, following a favourable Ministerial decision, as defined in the decree of 3 July 2012 relating to the PPST. An unfavourable Ministerial decision in respect of a position situated in a ZRR would result in the cancellation of the appointment.

Recruitment Policy :
As part of its diversity policy, all Inria positions are accessible to people with disabilities.
