Compétences

- A broad understanding of high performance computing (programming models, benchmarking/profiling, optimization, parallelization, I/O) will be very valuable. In particular,
previous experience in submitting jobs to clusters/supercomputers (batch schedulers, monitoring) and basic Linux admin skill would be a plus.

- Python proficiency would be appreciated, as well as familiarity with the Dask library.
- Knowledge of agile project management techniques (scrum, kanban, SAFe) will be valuable to interact with SKA development teams.

Languages: high proficiency in English (many collaborators are native speakers).

**Avantages**

- Subsidized meals
- Partial reimbursement of public transport costs
- Leave: 7 weeks of annual leave + 10 extra days off due to RTT (statutory reduction in working hours) + possibility of exceptional leave (sick children, moving home, etc.)
