2023-06514 - Post-Doctoral Research Visit F/M
Postdoctoral Scholar Position in Social Cognition F/M: Neural correlates of social skills in middle childhood

Type de contrat: CDD
Contrat renouvelable: Oui
Niveau de diplôme exigé: Thèse ou équivalent
Fonction: Post-Docteurant

Contexte et atouts du poste
The ArticuLabo research group at Inria Paris is seeking a highly motivated postdoctoral researcher to join a multidisciplinary team developing an exciting and ambitious research program at the intersection of social neuroscience and artificial intelligence. Specifically, we are developing ways to use hyperscanning techniques to better understand how children in middle childhood use language and nonverbal behavior to build and maintain social relationships with peers. The results inform the design of innovative embodied conversational agents (ECAs) capable of helping children learn.

Recently, an ever-growing number of neuroimaging studies have shown that specific brain areas, such as the temporo-parietal junction, superior temporal sulcus, and pre-frontal cortex, show evidence of synchronization (i.e., inter-brain or neural synchrony) in people who are engaged in joint social interactions. This observation results from the use of hyperscanning, a technique that allows the simultaneous recording of several brains.

Mission confiée
We’re looking for someone with experience in neuroimaging of social cognition who can contribute meaningfully to this new era of hyperscanning research. Particularly, we are seeking someone who can assist in the design of rigorous naturalistic hyperscanning paradigms which investigate social phenomena such as collaboration, rapport, learning, and performance, and the analysis of the resulting data, preferably using newer machine learning analytic tools. In addition to investigating understudied phenomena of social cognition, these findings will eventually be utilized to improve a virtual peer—a conversational agent that builds bonds with children in the service of learning.

The project will involve investigating the neural mechanisms underlying social cognition in real-time interactions of child peers dyads aged 5-12 years old using fNIRS hyperscanning. The ideal candidate will have experience with fNIRS data acquisition and analysis, as well as strong programming skills in Python and experience in developmental psychology, cognitive science, learning science, and/or linguistics will be an asset.

Principales activités
The successful candidate will work closely with the principal investigator and other members of the research team to design, supervise and contribute meaningfully to research, conduct experiments, analyze data, and prepare manuscripts for publication in high-impact journals.

Compétences
Qualifications:
- PhD in neuroscience, psychology, cognitive science, or a related field
- Experience with neuroscience data
- Experience in multidisciplinary cognitive science, social cognition in middle childhood, learning science, and/or developmental psychology
- Experience with scientific experiments involving children
- Familiarity with or interest in hyperscanning experimental design
- Strong programming skills preferably in Python and machine learning toolkits
- Experience with functional neuroimaging (preferably fNIRS and hyperscanning) and/or advanced time-series and/or multimodal data analysis and statistics
- Experience mentoring trainees and/or project management skills
- Excellent written and verbal communication in English and organizational skills
- Ability to work independently and as part of a team

Bonus Qualifications:
- Experience with PsychoPy, MNE, MNE-NIRs, and/or HyPyP
- Knowledge of French would be a significant plus but is not required
- Knowledge of machine learning methods to develop innovative methods of analysis
- Interest in neuro-AI to contribute to the implementation of powerful conversational agents

Avantages
- Subsidized meals
- Partial reimbursement of public transport costs
- Leave: 7 weeks of annual leave + 10 extra days off due to RTT (statutory reduction in working hours) + possibility of exceptional leave (sick children, reduction in working hours) + possibility of exceptional leave (sick children, partial reimbursement of public transport costs

Informations générales
- Thème/Domaine: Langue, parole et audio
- Ingénierie technique et de production (TIC) (BAP) E
- Ville: Paris
- Centre Inria: Centre Inria de Paris
- Date de prise de fonction souhaitée: 2023-08-01
- Durée de contrat: 3 ans
- Date limite pour postuler: 2023-07-31

Contacts
- Équipe Inria: COML

A propos d’Inria
Inria est l’institut national de recherche dédié aux sciences et technologies du numérique. Il emploie 2600 personnes. Ses 200 équipes-projets agiles, en général communes avec des partenaires académiques, impliquent plus de 3500 scientifiques pour relever les défis du numérique, souvent à l’interface d’autres disciplines. L’institut fait appel à de nombreux talents dans plus d’une quarantaine de métiers différents. 900 personnels d’appui à la recherche et à l’innovation contribuent à faire émerger et grandir des projets scientifiques ou entrepreneuriaux qui impactent le monde.

Inria travaille avec de nombreuses entreprises et a accompagné la création de plus de 180 start-up. L’institut s’efforce ainsi de répondre aux enjeux de la transformation numérique de la science, de la société et de l’économie.

Attention: Les candidatures doivent être déposées en ligne sur le site Inria. Le traitement des candidatures adressées par d’autres canaux n’est pas garanti.

Consignes pour postuler
This is a full-time position for up to three years. To apply for this postdoctoral scholar position, please upload to the Inria JobIn system a:
- An up-to-date CV
- A letter of motivation describing your experience and interests
- The names and contact information of 3 people who can write recommendations for you (please note that letters of recommendation will not be accepted - only names of recommenders that we will contact).
moving home, etc.)

- Possibility of teleworking and flexible organization of working hours (after 12 months of employment)
- Professional equipment available (videoconferencing, loan of computer equipment, etc.)
- Social, cultural and sports events and activities
- Access to vocational training

Rémunération

The remuneration will be established according to the profile and the experience of the candidate.

Sécurité défense:

Ce poste est susceptible d'être affecté dans une zone à régime restrictif (ZRR), telle que définie dans le décret n°2011-1425 relatif à la protection du potentiel scientifique et technique de la nation (PPST). L'autorisation d'accès à une zone est délivrée par le chef d'établissement, après avis ministériel favorable, tel que défini dans l'arrêté du 03 juillet 2012, relatif à la PPST. Un avis ministériel défavorable pour un poste affecté dans une ZRR aurait pour conséquence l'annulation du recrutement.

Politique de recrutement:

Dans le cadre de sa politique diversité, tous les postes Inria sont accessibles aux personnes en situation de handicap.
