Offre n°2024-07519

Development & Research Engineer @ Grenoble: Deep and Shallow Data Processing on Supercomputers

Le descriptif de l’offre ci-dessous est en Anglais

Type de contrat : CDD
Contrat renouvelable : Oui
Niveau de diplôme exigé : Bac + 5 ou équivalent
Fonction : Ingénieur scientifique contractuel
Niveau d'expérience souhaité : Jeune diplômé

A propos du centre ou de la direction fonctionnelle

The Centre Inria de l'Université de Grenoble groups together almost 600 people in 22 research teams and 7 research support departments.

Staff is present on three campuses in Grenoble, in close collaboration with other research and higher education institutions (Université Grenoble Alpes, CNRS, CEA, INRAE, ...), but also with key economic players in the area.

The Centre Inria de l'Université Grenoble Alpes is active in the fields of high-performance computing, verification and embedded systems, modeling of the environment at multiple levels, and data science and artificial intelligence. The center is a top-level scientific institute with an extensive network of international collaborations in Europe and the rest of the world.

Contexte et atouts du poste

The candidate will join the DataMove INRIA team located on the campus of the Univ. Grenoble Alpes near Grenoble. The DataMove team is a friendly and stimulating group with a strong international visibility, gathering Professors, Researchers, PhD and Master students all pursuing research on High Performance Computing.

This work experience will bring you skills from high performance computing up to deep learning that are in high demand.

This work is part of a joint collaboration with international academic partners, giving you the opportunity to work in an international context.

Hiring date is flexible, starting as early as September 2024. Initial contract is for 30 months, with possibilities for extension.

The city of Grenoble is surrounded by the Alps mountains, offering a high quality of life, and where you can experience all kinds of mountain related outdoors activities and more.

Principales activités

Dask (https://www.dask.org/) and Ray (https://www.ray.io/) are open source frameworks to distribute the execution of Python tasks an actors on supercomputer and cloud. They provide seamless parallelization of classical data processing libraries like Numpy (https://numpy.org/), Panda (https://pandas.pydata.org/) or Scikit-learn (https://scikit-learn.org), making them popular in the scientific data analytics and machine learning communities.

We developed Deisa (code: https://github.com/GueroudjiAmal/deisa - PhD: https://theses.hal.science/tel-04194958) to extend Dask with classical parallel applications based on MPI.

The data produced by each MPI process of the application are routed as soon as available to Dask workers that can execute tasks to process these data. Users can then conveniently rely on classical Python libraries like Numpy to process efficiently large amount of data.

We are looking for a candidate that will join our team for:

- Consolidating and extending Deisa, for instance to improve data transfer speed, or adding novel features for JAX (https://github.com/google/jax) and Pytorch (https://pytorch.org/) support.
- Study the feasibility of a Deisa variation for Ray. Ray is similar to Dask, but adopted a very
different implementation.

- Run experiments on a variety of supercomputers
- Participate to the research activity, possibly leading to publications.
- Collaborate with other European partners as this work is part of the European project Eocoe-III (https://www.eocoe.eu/).

Through this work the candidate will gain strong expertise in high performance computing, high performance data analysis up to deep learning. She/he will integrate a dynamics research team and have the opportunity to work in an international context.

**Compétences**

We welcome candidates with a master (or equivalent title) in computer science, experience with parallel programming, distributed data processing, deep learning or numerical solvers.

Expected technical skills include Linux, Python and some C/C++ programming practice, mastering of development processes is a plus (git, continuous integration, containers, etc.).

No previous work experience required as long as you are motivated and ready to train yourself to complement your skills.

Experienced candidates are very welcome with income adjusted to your experience.

Candidates with a PhD that are looking to complement their experience are also welcome.

A reasonable level of English is required. French is not mandatory and INRIA will provide French classes if needed.

To apply submit you CV, references, recent marks, and if available your last Internship/Master Thesis manuscript. With your application provide any element (github account, code snippets, etc.) that could help us assess your skills beyond your academic record, as well as a few references of persons we can contact to get some feedback on your qualities.

**Avantages**

- Subsidized meals
- Partial reimbursement of public transport costs
- Leave: 7 weeks of annual leave + 10 extra days off due to RTT (statutory reduction in working hours) + possibility of exceptional leave (sick children, moving home, etc.)
- Possibility of teleworking (90 days / year) and flexible organization of working hours (except for internship)
- Social, cultural and sports events and activities
- Access to vocational training
- Social security coverage under conditions

**Rémunération**

From 2,692 € (depending on experience and qualifications).

**Informations générales**

- **Thème/Domaine** : Calcul distribué et à haute performance
- **Ville** : Saint Martin d'Hères
- **Centre Inria** : Centre Inria de l'Université Grenoble Alpes
- **Date de prise de fonction souhaitée** : 2024-09-01
- **Durée de contrat** : 2 ans, 7 mois
- **Date limite pour postuler** : 2024-05-31

**Contacts**

- **Équipe Inria** : DATAMOVE
- **Recruteur** : Raffin Bruno / bruno.raffin@inria.fr

**A propos d'Inria**

Inria est l'institut national de recherche dédié aux sciences et technologies du numérique. Il emploie
2600 personnes. Ses 215 équipes-projets agiles, en général communes avec des partenaires académiques, impliquent plus de 3900 scientifiques pour relever les défis du numérique, souvent à l’interface d’autres disciplines. L’institut fait appel à de nombreux talents dans plus d’une quarantaine de métiers différents. 900 personnels d’appui à la recherche et à l’innovation contribuent à faire émerger et grandir des projets scientifiques ou entrepreneuriaux qui impactent le monde. Inria travaille avec de nombreuses entreprises et a accompagné la création de plus de 200 start-up. L’institut s’efforce ainsi de répondre aux enjeux de la transformation numérique de la science, de la société et de l’économie.

**Attention** : Les candidatures doivent être déposées en ligne sur le site Inria. Le traitement des candidatures adressées par d’autres canaux n’est pas garanti.

**Consignes pour postuler**

**Sécurité défense :**
Ce poste est susceptible d’être affecté dans une zone à régime restrictif (ZRR), telle que définie dans le décret n°2011-1425 relatif à la protection du potentiel scientifique et technique de la nation (PPST). L’autorisation d’accès à une zone est délivrée par le chef d’établissement, après avis ministériel favorable, tel que défini dans l’arrêté du 03 juillet 2012, relatif à la PPST. Un avis ministériel défavorable pour un poste affecté dans une ZRR aurait pour conséquence l’annulation du recrutement.

**Politique de recrutement :**
Dans le cadre de sa politique diversité, tous les postes Inria sont accessibles aux personnes en situation de handicap.
